Competitive Exams: Revision Terminology Part 34

Get top class preparation for competitive exams right from your home: **get questions, notes, tests, video lectures and more-** for all subjects of your exam.

- Potato type – stomata more on under surface.
- Actual amount of moisture by air = absolute humidity.
- Active absorption of H₂O resp of roots give energy.
- Max amount of area (1) hepatic vein (2) Renal artery.
- Ascending limb loop of henle is permeable to Na⁺
- Human barr body – female somatic cell.
- Pouched mammals with true placenta – premales.
- Gluconeogenesis – fat, protein, N₂ food → carbohydrates.
- Disease common in Negroes = sickle cell anemia.
- Acrosome reactⁿ in sperms triggered by release of fertilizing.
- International centre of genetic eng & Biotech. In India – Delhi.
- If haemozoin is ingested by female anapholes – toxicant will be
- Digested – only gametocytes will remain alive in anapholes rest all die.
- Monosporic 8 nucleated embryo sac = polygonum.
- Cough – Codiene.
- Tapital nuclei in angiosperm = polyploids.
- Hypo pigmented insensitive slain patch – leprosy.
- Endomostrom vaccine – tuberculosis.
- Central institute of mental retardation – tiruvanmthapuram.
- Rocky mountain spotted fever – ticks.
- TAB vaccine for typhoid.
- Sal forest – Sapura hills.
- Burnner's gland in Submucosa of duodenum.

- Blood vessels of liver = sinusoids.
- Period bet. 2 nuclear divisions during mitosis suspension of metabolic activity.
- Loim tailed monkey – macula Silenus – western ghats including tramstancore & nysore.
- Mutation must occur in germplasm DNA.
- Nandan kanan Zoo Known for Milgiri Tahr.
- Increment in heart chambers with evolution = Biogenetic law.
- In Defroster's Kidney Shaped sours is covered by indusism.
- Maize rich in thiamine.
- Para sexual hybridization – Fusion of somatic protoplast.
- Gwar gun – Seed of cyanosis.
- New world crop in Kerala – manihot utilisima.
- Paper – 1st by Cyperus in Eygpt.
- Home of forest – Butea Monospersma.
- M₂ deficient Soil cajanus cajan.
- Developments of optic lobes max in birds.
- Monocots – Trimerowers flowers.
- Enhydrina – Poisonous Snake.
- Urodela have smooth moist skin.
- Maltase cross – Vertebra of shark.
- Pigeon in ab. Of down feathers will not protect against ectoparasites.
- Birds fly from one place to another = Volvont.
- Ringer solution = Na + K ions.
- Man applied heavy fertilizers on lawn & gave more water – grass turned brown as roots were killed due to loss of water by osmosis.
- Formalin preserved spirogyra in hypertonic sugar solution – nothing Happens axtion spectrum of transpiration = Blue & Red.
- Transpiration = Physiological.
- Evaporation = Physical process.
- Cartilage fish = Liver Bilobed.

- 1st vitamin by fermentation – Vitamin C.
- 1st org. acid by fermentation – Lactic acid.
- Father is resp for the sex of child but biologically women is superior to the man.
- Kuru disease – Prion.
- Cadang – 2 diseases – Viriod.
- 1st line of defence – External – skin, mucous, chenni cals.
- 2nd line of defence – internal – WBC, interferon, inflammatory, fever.
- 3rd line of defence – immunity.
- Autumn wood narrow lumen & less vessels & trachieds.
- Low op – Hydrophyly.
- High op – Xerophyly.
- $DPD = OP - TP$.
- 100 % humidity → no transpiration.
- Rate of transpiration = $\frac{P_i - P_a}{\bar{x} + R_a} =$
- Homologous – thorn of Bongain vilea & Tendril of Cucurbits.
- Analogous – Ginger & sweet potato – Storage.
