### Question 1

Out of a salary of ₹ 75000, I kept  $\frac{1}{3}$  as savings. Out of the remaining money, I spend 25% on food and 40% on house rent. How much do I spend on food and house rent?

### Question 2

A big mega store is having a festival sale and all the items are having 25% discount.

Vivek is having a ₹ 50 Gift and he has chosen a game whose marked price is ₹ 300. Now Vivek is confused how to calculate the discount and what remaining money need to be paid to the clerk

The sales clerk has suggested two ways to calculate the concession

Method 1: Subtract ₹ 50 from marked price and then take 25% discount on the remaining amount

Method 2: Take 25% discount on the marked price and then subtract ₹ 50 from it

Now the questions for you

(a) Do you think both the method will give same result? If not predict which method will be beneficial to him

(b) Calculate the amount Vivek has to pay the clerk in each case

(c) What method do the store actually uses? And why?
