

Placement Papers: Axes 2007 Paper

Get top class preparation for competitive exams right from your home: [get questions, notes, tests, video lectures and more](#)- for all subjects of your exam.

Computer science branch students had 4 sections to answer:

1. General aptitude (simple-easier than RS Agarwal) Q – 11. Was wrong it was relating to some fatal relationship. The other's were number sequencing, GRE analogies, antonyms (abt. 10 questions) . Totally about 50 questions
2. Microcontroller 8086 (basics only, some questions like max. Unsigned number in 8086 ans = $2^{\text{power}16}$) there were some small codes you need to trace.
3. 'c' was simple, there were some stubs o/p was to be traced. There was one bit wise 'or' problem
4. I felt this the toughest (Java/C ++ /OS concepts) Java and C ++ were general questions, no progs. And os was easy (i guess i got just 40 % right in this section) .
