Technical Papers Java Questions: Amdocs

Glide to success with Doorsteptutor material for competitive exams : **get questions, notes, tests, video lectures and more**- for all subjects of your exam.

ALL IN A MIX: (VERBAL, QUANTITATIVE, DIAGRAMMATIC, C, SQL, UNIX, COMPUTER CHECKING ETC.)

All fat people are not dancers, food loving people are all fat. Find the contradictory statement?

The day before yesterday was WEDNESDAY then the day after 2morrow is?

Totally how many will go to the party?

Mary's father's brother is Andrews Andrews daughter's son is Sunil Brothers name is Sam Who is Sam to Sunil?

There are A, B techers and C, D doctors. Find the possible no of combinations that should not be repeated more than once?

There are 3 males and 2 females, find the possible no of orders that can be made by making the arrangement as in between two males one women is allowed to sit?

Computer checking: EeeDD

The write answer is 2 (eeeDD)

The syntax of command statement in UNIX

If the permission for a file is ooo, then the file can be accessed by whom?

Where we can run two same programs on a UNIX console at the same time?

Which is the Shell of UNIX?

Wat is the number of the masked code ee@?

We are UPDATING a field in SQL and ALTER the row also. After giving the COMMIT command the system is crashed. Wat will happen to the commands given, whether it will UPDATE and ALTER the table r not?

If we r terminated at the middle of the program execution in UNIX, wat will happen to the program, it will

continue running r terminate r the o/p will be send to ur mail?

How will add additional conditions in SQL?

How will u print TATA alone from TATA POWER using string copy and concate commands in C?

If switch (n)

case 1: Printf ("CASE!") .

case (2) : Printf ("default")

break.

Wat will be printed?

How will u divide two numbers in a MACRO?

int a, b.

```
main () scanf ( " _____ " &first, &b ); if ... {printf ( "Print first" ); else Printf ( "..." );
endif}
```

Wat will come in the 9 dash?

Wat will happen if we replace Print A as Print X?

Wat will come in the 3 dash?

Wat will happen if we interchange 4 and 7?

Wat will come in the 4 dash?

Amdocs test has 2 sections

Aptitude consist of 4 sections n consisted of diagrammatic reasoning n non verbal stuff

Technical test consisted of 4 sections each of pseudocode, c, unix n sql all tests r computer based

Tests

1. Analytical reasoning: Maths
2. diagrammatic reasoning: In this, we were given 8 diagrams and had to select the 9th corresponding dg frm the givn choices. U have to be very fast in this test.
3. problems to be solved using Venn diagrams.
4. This test was to check our adaptation to the computer screen. We had to solve abt 30 qs in 15 min. U have to be very very fast in this also.
5. In this test we were given a booklet of abt 7 – 8 pgs in which there was the syntax of some hypothetical lang (its syntax was somewhat like Visual Basic) , This was very easy since the whole syntax was given & u can refer to it. We were given almost 90 – 120mins for this test. If u want u can rd the booklet before the start of the test. The qs consisted of programs for which u have to find the o/p or where there is wrong syntax etc.

6. C test: Study pointers very well programming strengths. It also consists of qs on args of main function, i.e., argc and argv
7. SQL test: It consisted of sql queries mainly inner join, outer join, group by statements etc.
8. Unix test: Kernel, 1 – 2 qs on TCP/IP, basic commands (more on commands) .

Some Sample Questions

All birds are animals. All animals are four legged. Implications

All fat people are not dancers, food loving people are all fat. Find the contradictory statement?

The day before yesterday was WEDNESDAY then the day after 2morrow is? 3. A goes to the party if B goes

B goes to the party if C goes

C goes to the party if D goes

Totally how many will go to the party?

Mary's father's brother is Andrews Andrews daughter's son is Sunil Brothers name is Sam Who is Sam to Sunil?

There are A, B techers and C, D doctors. Find the possible no of combinations that should not be repeated more than once?

There are 3 males and 2 females, find the possible no of orders that can be made by making the arrangement as in between two males one women is allowed to sit? 8.
