2)min no of goals scored by any player??.....

This was..i think the toughest in this section

Q>Next 5 were firm odd figure out type

very easy solve these 1st..5 marks r for sure.

Q11-15:data sufficiency..easy 1s

Q16-20:data interpretation

Q>21- 25(family tree was given)> puzzle form a the'r professions..a 5 qp like

how many females r there in d family?

this was like d puzzle text from R v Aggravat..it a diff 1

Q>26 to 30 firm syllogism

these r very easy

to b very quick read the statements 1s and make a rough idea

a then go by options..all do finally find an option matching ur guess

Section 2:verbal reasoning(40 qp 30 mins)

there r lot two RCs ..very easy 1s..dont leave it they seem to b lengthy bt easy to comprehend.No do attempt both at 400 sec.
then r guess there r 18 questions on correct the sentences..b perfect sat articles..guesspolicies..notes a data all a need to crack it..d idd RCs a all these chapters from CAT notes from IMS.

the sentences r lengthy..almost 4 to 5 lines each..as if a stated i a have to read that sentence+4 options..So almost 20 lines for a q! but b r tremendously quick..Don't go for each a every option..Read the options..randomly..most of the mistakes r related to traces and sentence

construction.

Few qp on deriving conclusions from passages..if don't render a sequence of these qp so jst giving d types of qp)

Then there r some q to find the correct option to fill in d blank..dont render how many of them were there..

thats all i render abt d text.

HE:how will u overcome ur this shortcoming?

Me:well..I'll assign more work to dat person when not standing up to the mark.

HE:if hes still not not doing well.

ME:then i have to adopt out d best strategy..nd it may not b advisable to b personal to any 1 at ur workplace..bt if it works for me..i think i shld talk to him in person a try to understand d prob..nd him.

HE:what will u do exactly??

ME:I'll arrange d meeting..Put this prob in front of them..Its my b'd case that i mean r not good at ur work..they have been assigned..as ill try to rotate the work..see if dat gives d result..He was pretty much impressed.This i guess was a situation reaction test for me.)

Me: 15

HE:now i say 30-550..how??(recall they want ask a d puzzle in very plain manner..so try to decode the puzzle right way..it is quite obvious dat by multiple 5-5-5-5 cant be 550..after saying everything..he said)
a cosine 1 straight line anywhere on d left side of d + sign..a not make -> sign..as not equal to)

Me:(i was standing at 12m i got it in jst 5 to 6 seconds

(This was d toughest he used to if u go by 100..d end up with nothing i tried it as both d parts r of 1000..bt then he gave me that in a equation form as --47x+---17y=1000..again i tried bt i couldnt..stopped myself..dont give up
